Vulcan effect — before and after

Before installing the Vulcan system, the pipeline had a lot of sedimentation of scale, the client had to do manual cleaning.

After 3 months of Vulcan, it has begun to erode and clean the scale out of the system.

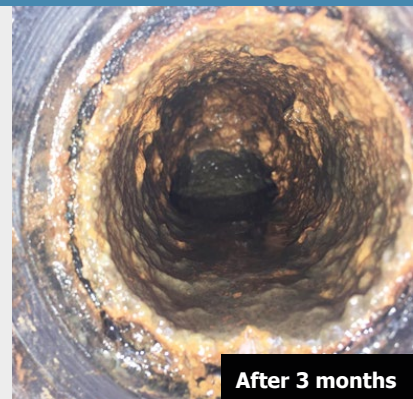

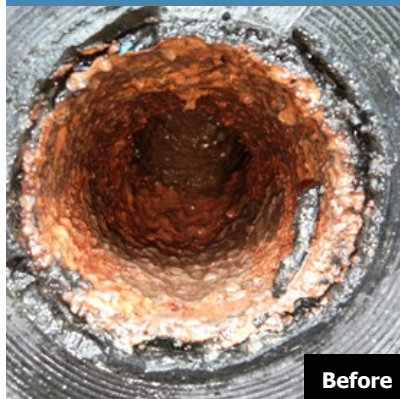

The clients are happy with the performance of Vulcan.

Hot Water Tank

After 3 months scale is no longer forming and the hot water tank is free of scale and sediment.

Hot Water Pipe

After 3 months the rust in the pipe has lightened and the amount of scale is gradually reducing.
